PROFESSIONAL SUMMARY

Software Engineering undergraduate with hands-on experience building full-stack applications using MERN stack, microservices, and cloud-ready technologies. Experienced in payment integration, REST API development, and scalable system design. Seeking a Software Engineering Internship to contribute to real-world development teams.

SKILLS

TECHNICAL SKILLS

- Programming Languages:** JavaScript, Java, Python, C#, C++, PHP, Kotlin, HTML
- Frontend Technologies:** React.js, Next.js, Vite, Tailwind CSS, HTML, CSS
- Backend Technologies:** Node.js, Express.js, Java Servlets, REST APIs
- Databases:** MongoDB, MySQL
- Tools & Platforms:** Git, GitHub, Docker, Kubernetes, Postman, Figma, Android Studio, Visual Studio Code, IntelliJ IDEA
- Concepts:** JWT Authentication, RESTful APIs, Full-Stack Development

PROFESSIONAL SKILLS

- Problem Solving, Quick Learner, Teamwork, Communication Skills, Time Management, Adaptability
-

PROJECTS

Microservices Healthcare Platform (MediBook)

<https://github.com/imeshweerasuria/smart-healthcare-microservices.git>

Technologies: MERN Stack, Microservices, Docker, Kubernetes, Stripe, REST APIs

- Developed microservices-based healthcare platform using MERN stack
- Containerized services using Docker and deployed using Kubernetes
- Implemented Stripe payment gateway for appointment payments
- Built refund management system for cancelled appointments
- Developed automated email notifications for payment and refund confirmations
- Designed RESTful APIs for service communication and transaction handling
- Implemented scalable architecture with separate services for users, payments, and appointments

Loan Lending Platform (Micro-Loan Connect)

<https://github.com/imeshweerasuria/microloan-connect.git>

Technologies: MERN Stack, Stripe, Postman, REST APIs

- Developed full-stack loan lending platform for borrowers and lenders
- Implemented Stripe payment integration for secure loan repayments
- Built RESTful APIs for loan requests, approvals, and repayment tracking
- Tested and validated APIs using Postman
- Designed responsive UI using React and Tailwind CSS

- Implemented authentication and protected routes using JWT

Online Food Ordering & Reservation System (Royal Bakes)

<https://github.com/wayodyavitharka/royalbakes.git>

Technologies: MERN Stack, Stripe, Leaflet, REST APIs

- Developed full-stack web application for online food ordering and reservations
- Implemented Stripe payment gateway for secure online payments
- Built order management system for tracking customer orders and status updates
- Integrated Leaflet maps for location selection and delivery visualization
- Designed responsive user interface for seamless ordering experience
- Developed backend APIs for order processing and payment handling

Hand-Drawn Art E-Commerce Web App (Pixaku)

Technologies: MERN Stack, Stripe, Ngrok, REST APIs

- Developed full-stack e-commerce platform for selling hand-drawn artwork
- Implemented product listings, shopping cart, checkout workflow
- Integrated Stripe payment gateway for secure online transactions
- Built user authentication and protected routes

Anime Recommendation Web Application (AniRec)

Technologies: MERN Stack, REST APIs

- Developed personalized anime recommendation platform
- Implemented dynamic UI components for user interaction
- Built preference-based recommendation system

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT) | Malabe, Sri Lanka

BSc (Hons) in Information Technology – Software Engineering Specialization
2023 – 2027

G/Prajapathi Girls' College | Ambalangoda, Galle, Sri Lanka

GCE Advanced Level (A/L) – Science Stream | 2022

LANGUAGES

- English
- Sinhala

AVAILABILITY

Available for Software Engineering Internship | Immediate
